

Interim Management Statement for the three months ended 30th September 2008

Jardine Lloyd Thompson Group plc (“JLT” or “the Group”) is today releasing its Interim Management Statement for the three months ended 30th September 2008 in accordance with the requirements of the Disclosure & Transparency Rules of the UK Listing Authority.

Performance during the period

JLT remains on track to deliver sustainable profitable growth in 2008, despite the current circumstances of unprecedented dislocation and uncertainty in the financial sector worldwide.

The Group's trading performance in the third quarter was in line with our expectations across our five lines of business - retail, specialty, wholesale, reinsurance and employee benefits. JLT's balance sheet remains strong with low net debt and significant headroom within the Group's bank facilities which are committed until December 2011.

Since the beginning of the third quarter the Sterling/US dollar exchange rate has moved in JLT's favour. However, the full benefit of that movement will be deferred due to our rolling hedging programme and is also partly offset by the weakening of other currencies that are significant for JLT's results, such as the Australian dollar. There has also been a general reduction in interest rates, which has acted to reduce our investment income.

JLT continues its planned investment in growth initiatives such as Thistle Underwriters to perform platform underwriter functions, Insurantz.com for online insurance aimed at the SME markets, JLT's online pensions and benefits platform and the ICAP-JLT joint venture broking Insurance Linked instruments such as Catastrophe Swaps and Bonds. We remain confident that these investments will serve us well in the medium to longer term.

Outlook

Looking forward, we continue to benefit from our strong financial position and balanced global spread of business, with some two thirds of our clients based outside the UK.

We share the widespread concern about prospective levels of economic activity and, although logic would suggest that recent insurance industry losses and adverse economic conditions should lead to a hardening in insurance rates during 2009, we have not as yet seen any sustained evidence of a cyclical turn other than in the Aviation and professional lines sectors and for catastrophe exposed energy risks. The primary insurance market continues to be very competitive.

Dominic Burke, Chief Executive said:

“We are facing a challenging insurance market and very difficult economic conditions but in the last three years we have taken the corrective actions needed and have put the right strategy in place to ensure that JLT's operations are in a strong position to make continued financial progress.”

JARDINE LLOYD THOMPSON
Group plc

There have been no further material events or transactions in the quarter and there have been no significant changes in the financial position of the Company since the publication of the Interim Results for the six months to 30th June 2008.
