for Financial Institutions

JARDINE LLOYD THOMPSON ASIA

## Financial Solutions for Financial Institutions

### Financial Solutions Overview

JLT provides transactional risk, insurance broking and a range of consultancy services. Asia's Financial Institutions have experienced many challenges in managing rising exposures emerging from the globalisation of financial products and services, modernisation of financial markets, evolving legal and regulatory environments and rising corporate governance expectations. Basel II compliance poses significant challenges and also offers an opportunity to achieve distinct competitive advantage. Notwithstanding Basel II, there is an increasing need to emphasise better governance of operational risk exposures - risks that can cause serious financial losses to a financial institution and its shareholders and damage corporate reputation and revenue.

### Areas of Expertise

We established our focus on the Asian Financial Institutions sector in 1989 and have since built up extensive market environment knowledge as well as strong relationships with insurers and market regulators. Our team of senior brokers are widely experienced in the design, negotiation and implementation of sophisticated insurance programmes. We have strong track record in providing creative solutions for premier banks, stock brokers, fund managers, investment advisors, stock exchanges, credit unions and government sponsored agencies across the region.

We are dedicated to the development of customised risk solutions based on the use of insurance as contingent capital, credit support and risk financing. Today, we have achieved core market leadership in all aspects of risk for Financial Institutions.

Our specialists have also undertaken various consultancy assignments that range from risk review and risk management strategies for individual Financial Institutions, to the development of risk transfer facilities with local market regulators.

Our capabilities are further strengthened by our specialist claims consultancy arm which provides ongoing claims management services as well as assistance in formulation, negotiation and settlement of large and complex claims.

Our Asia team works closely with our global Financial Solutions team, enabling us to integrate and mobilise expertise for large clients who require the global reach offered by JLT's worldwide network of offices while ensuring they receive the quality of service of a boutique broking house.

“ There is an increasing need to emphasize better governance of operational risk exposures. ”

## Financial Solutions for Financial Institutions
